Prof. Dr hab. Marek Stankiewicz  
Director  
The National Center for the Synchrotron Radiation SOLARIS

Dear Prof. Stankiewicz,

We would like to thank you for the great visit we had on December 18, 2015 to the SOLARIS Center. A group of twenty high-school students with their Physics teacher from the International School of Kraków had the great opportunity to admire so many details of the synchrotron setup.

Our excellent tour guides, Dr. Adrianna Wawrzyniak and Dr. Marcin Zając, led the group through the whole process of practical generation of the synchrotron radiation and its possible applications - we were presented the linear accelerator, the storage ring details and the end-of-the-line measuring devices. They shared their extensive knowledge of the synchrotron with us and patiently answered countless number of questions. We all appreciate the time they spent with us.

We would like thank Ms. Alicja Górkiewicz for making arrangements for the trip and finding the best suitable time for us to visit the Center.

We hope that the visit will inspire some of our students to consider their career in science.

Sincerely,

Erik Lutley  
Secondary School Principal  
International School of Kraków

Jacek Guzik  
Physics Teacher  
International School of Kraków
