

CROSSCARPATIAN

synchrotron school

10th–14th June, 2024

SOLARIS Centre
Krakow, Poland

Free of charge!

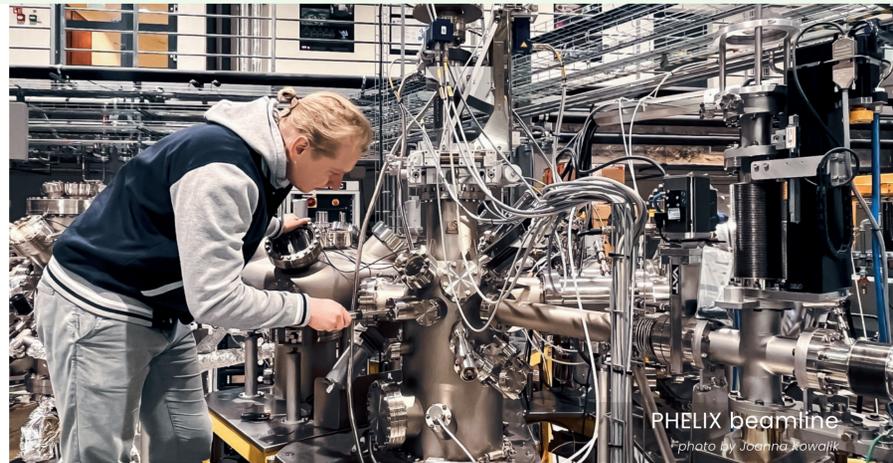

About **CSS2024**

„Crosscarpatian synchrotron school” is aimed at students, postdoctoral, and senior scientists who have little, or no experience in the field of synchrotron radiation or dedicated synchrotron techniques. The participation in school is **free of charge** – secure accommodation and catering during the workshop.

Practical Sessions

Two experimental stations of your choice to receive full training. Hands-on experience in experiment design, sample preparation, measurements and data processing. **Free access** to SOLARIS facilities, including beamlines DEMETER, PIRX, URANOS, PHELIX, CIRI, POLYX and ASTRA as well as at the cryo-electron microscopy infrastructure CRYO-EM.

Key Topics

- synchrotron radiation and its interaction with matter
- photoemission and absorption spectroscopy
- imaging techniques, microscopy and spectromicroscopy
- tutorial on preparing and writing proposals
